Farming Implements.

More Wheat and
Better Wheat.

If you want good milk and Butter, feed your cow. If you want good work feed your horse. If you want good wheat and more of it feed your lands with READS FERTILIZERS. We call the attention of the farmers of Obion Co. to the certificates of the farmers who have used Reads Fertilizers for wheat and clover.

This Fertilizer is no Humbug but is honest goods, made by honest men. Put up in our own State, and analyzed by our State Chemist, and guaranteed by the

READ PHOSPHATE CO.

Nashville, Tenn.

Who are responsible for all they say.

BOWLING GREEN, Ky., July 4, 1898.
Messrs. J. W. Bearce & Co., City.

DEAR SIR:—I bought of you last season fifteen tons of "Read's Alkaline Bone" for my wheat, and the results have been very satisfactory indeed. I have paid a great deal more for fertilizers and I did not get any better results. I can recommend Read's goods highly as being a first-class Fertilizer. I expect to use it again. Yours truly, E. L. MOTTLEY.

BOWLING GREEN, Ky., July 4, 1898.
Messrs. J. W. Bearce & Co., City.

DEAR SIR:—It gives me pleasure to say to you that the Read's Fertilizer, "Blood and Bone" and "Alkaline Bone," bought of you last season, has given me very, very fine results, and I can cheerfully recommend it to my farmer friends who expect to use fertilizers on their wheat. It will certainly make the yield. I used a car this year and expect to use it again. Yours respectfully, J. T. DISMAN.

ELIZABETHTOWN, Ky., Jan. 27, 1899.
C. W. Quiggins:

DEAR SIR:—This is to certify that I used last year Read's Alkaline Bone Fertilizer. It gave me entire satisfaction, in fact, I made more wheat per acre than any of my neighbors. I made 25 bushels per acre.

GEO. RALEY.
I have the pleasure of sending you the above certificate of Mr. George Raley. His land is very thin and on one of the highest points on Muldrough's Hill. Truly &c., C. W. QUIGGINS.

The Read Phosphate Co., Nashville, Tenn.:

DEAR SIR:—I was induced by your agent, J. H. Winfree, to try a ton of your Alkaline Bone. I have always been opposed to the use of fertilizers, but can say now I was wrong. I sowed about 100 pounds to the acre, and I would stop the feed of the fertilizer at times that I might see the difference. Any one riding along the road could note the very spots, and I could tell the difference, until I cut off the stubble, the wheat being about twice as thick, the yield being much more. My wheat looked so fine that I was very frequently asked what I had done to it by parties passing the road. I now have a fine stand of clover where I used the fertilizer, while my neighbors have lost theirs. I didn't need any persuasion to get me to buy this year. Respectfully yours, LUTHER SMITHSON, Church Hill, Christian County, Ky.
